WORK EXPERIENCE

Web Developer/IT Technician (Full-time) | Feb 2022 - Present

Sacred Heart College Inc

- Design and implement front-end components for a Student Management System using Vue JS and Quasar framework.
- Collaborate closely with a team to define the back-end infrastructure and application architecture.
- Develop user-friendly interfaces focused on performance and accessibility.
- Maintain and repair computer hardware and software.
- Document IT procedures to streamline onboarding.
- Manage and maintain different student management systems developed with PHP, Vue.js, HTML, CSS, and JavaScript, utilizing MySQL and PostgreSQL as database backends.
- Manage user accounts, permissions, and access to systems.
- Diagnose and resolve technical issues, perform backups, and manage software updates.
- Test, troubleshoot, debug and create custom reports from existing applications.
- Monitor system performance and identify areas for improvement.

Database Reporting Specialist (Part-time) | May-Aug 2023

3D Technologies

- Maintained database systems and created custom dashboards using Microsoft Power BI.
- Optimized Microsoft SQL queries for enhanced performance.
- Ensured accuracy and consistency in data reporting.
- Assisted with data migration and data cleansing processes.
- Work collaboratively with the team to monitor progress and ensure project deadlines are met for successful releases.

Graphic Designer (Volunteer) | 2017-2019

Alvin L. Young NHS

- Created designs for promotional items including t-shirts, cups, pillows and bags.
- Designed a first-place winning reusable grocery bag for a competition organized by The Belize Department of Environment (DOE).
